## Skills

---

**Languages:** HTML5, CSS3, JavaScript (ES6+), Java

**Frameworks:** React.js, Redux, React Native, Node.js, Express.js, Tailwind CSS

**Databases:** MongoDB

**Tools:** Git, Postman, VS Code

## Experience

---

### Feather Softwares

Nov 2024 – Feb 2025

*MERN & React Native Developer*

- Developed scalable web and mobile applications using the MERN stack and React Native, focusing on API development, code optimization, and performance improvements.
- Built a Student Management System with React.js to replace manual Excel processes, improving workflow efficiency.
- Created user-friendly interfaces for mentors to manage student data in organized tables.

### Error Makes Clever

Oct 2024 - Nov 2024

*MERN Stack Development Intern*

- Developed front-end features using React.js and built RESTful APIs with Node.js and Express.js for seamless communication.
- Managed data efficiently using MongoDB and performed CRUD operations for smooth application functionality.

### AK Infopark

Sep 2024 – Oct 2024

*Full Stack Development Intern*

- Built full-stack applications using the MERN stack, focusing on responsive design and API integration.
- Implemented Tailwind CSS for styling and ensured cross-browser compatibility and mobile responsiveness.

## Projects

---

### WalMart – Full-Stack E-Commerce Platform (MERN)

- Developed a full-stack e-commerce platform using the MERN stack (MongoDB, ExpressJS, ReactJS, NodeJS).
- Implemented features such as an admin panel, shopping cart, order placement, and product management.
- Used Tailwind CSS for responsive design, ensuring a seamless user experience across all devices.
- Integrated secure user authentication and real-time updates using RESTful APIs, leveraging React Context API for global state management.

### Gypsy E-Commerce App – React Native & MERN Stack

- Developed a mobile e-commerce application using React Native with JWT authentication and Redux for state management.
- Integrated API calls with Axios and Async Thunk for efficient data handling and performance optimization.
- Built a backend using Node.js, Express, and MongoDB to manage user authentication, products, and orders.
- Created a separate admin web application for product management and real-time monitoring.

## Education

---

### Satyam College of Engineering

2023 – 2026 (Correspondence)

*BE - Computer Science*

### Kamaraj Polytechnic College

2017 – 2020

*DME - Mechanical*

*CGPA: 82%*

## Certifications

---

**Full Stack Development (MERN)** - Completed a Three-month course at EMC Academy, gaining expertise in building full-stack applications using MongoDB, Express.js, React.js, and Node.js.

**MERN Stack Development Internship** - Completed a One-month internship at EMC Academy, focusing on hands-on experience with MERN stack technologies.

**Full Stack Development Internship** - Completed a One-month internship at AK Infopark Pvt. Ltd., working on real-world projects involving front-end and back-end development.
